REVANESSE® VERSA™+

with Lidocaine

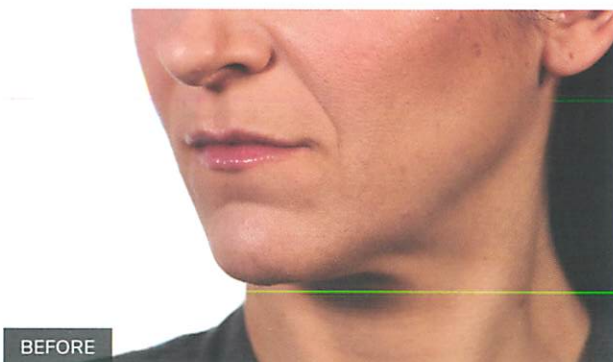

For those who pursue peace of mind, Revanesse® Versa™+ offers all the benefits of Revanesse® Versa™ with the addition of Lidocaine.

Lidocaine is a synthetic compound used as a local anesthetic.

Real Results.

KRISTA age 42

Before her treatment, Krista had moderate lines appearing from the base of her nose to the outer corners of her mouth. Krista's after image was taken within 2 hours of the treatment and shows a reduction in the severity of the lines in the treated areas.

BEFORE

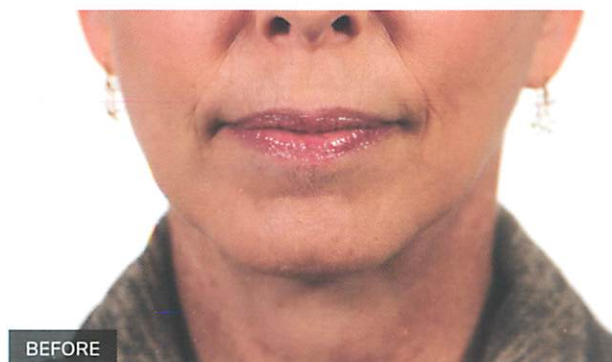

AFTER

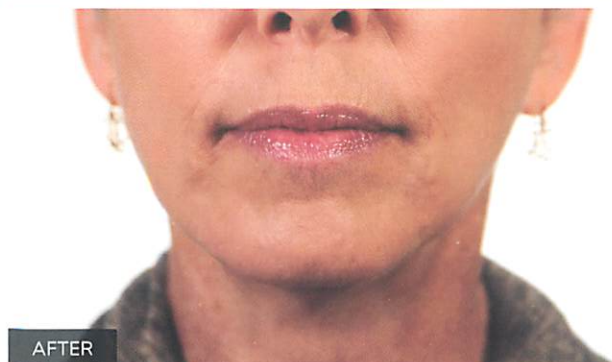

6 MONTHS LATER

ELLEN age 60

Before her treatment, Ellen had moderate to severe lines appearing from the base of her nose to the outer corners of her mouth. Ellen's after image, taken within 2 hours of the treatment, shows a natural looking, but noticeable difference in the reduction of wrinkles and increased smoothness in the treated areas.

AFTER

IMPORTANT SAFETY INFORMATION

What are the risks?

Bleeding and Bruising: Bleeding is usually minimal and resolves within a few minutes. It is possible to have a bleeding episode from the injection of the local anesthesia or filler that requires treatment, but it is unusual. Bruising in the area is also an expected reaction and can take up to a week to resolve.

JENNIFER age 41

Before her treatment, Jennifer felt that the lines from the base of her nose to the outer corners of her mouth were starting to "show her age." Her after image, taken within 2 hours of the treatment, shows a reduction of creasing and increased smoothness in the treated areas. Jennifer was excited to see noticeable results immediately.

BEFORE

AFTER

Swelling: Swelling is also expected and may take several days to a week to resolve. It is unusual but medical treatment may be necessary if swelling is slow to resolve.

Pain: Some discomfort is expected with injections but usually lasts less than a day.

Smooth & Refine Your Appearance

LONGEVITY

You may find that Revanesse® Versa™ will help in the improvement of your nasolabial folds (laugh lines) for up to 12 months with optimal correction.¹

LESS SWELLING

In one of our clinical trials, 50% more patients treated with a comparative product experienced swelling, than patients who were treated with Revanesse® Versa™.²

DESIGNED FOR SAFETY

The Revanesse® Versa™ formula is well-studied, with over 300 subjects of multiple skin types, treated in three clinical trials, with no serious adverse events reported.

IMMEDIATE RESULTS

A Revanesse® Versa™ treatment is minimally-invasive and provides immediate results. Take control of the signs of aging and ask your healthcare provider if Revanesse® Versa™ is right for you.

1 Multicenter Study to Evaluate the Safety and Efficacy of Revanesse Ultra Retreatment

78.1% of subjects reported being improved, much improved, or very much improved at 52 weeks according to their pGAI scores.

2 Injection site swelling (47.2% [77/163] with Revanesse® Versa™, 71.1% [116/163] with Comparator)

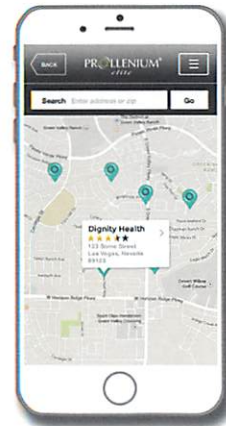

IMPORTANT SAFETY INFORMATION

Side Effects: The most common side effects include: bruising, redness, swelling, pain, and itching. Ask your doctor if you have questions about any of the side effects. Please tell your doctor or staff right away if you have any side effects or any other health problems whether or not you consider the problems related to the product.
